

Rediscover the joy of medicine

What is OptumCare?

OptumCare® is a leading health care organization providing physician-led, patient-centric, integrated care that is improving the health of patients and communities. We do this through our select network of providers who have the tools and technology to provide the right care to meet each patient's unique health care needs.

OptumCare provides a full range of services, when and where people need it, including individual and family care, urgent care, and advanced care for serious illness and chronic conditions. Our team includes more than 24,000 primary care providers, nurse practitioners, physician assistants and specialists serving 8 million patients through many health plans and hospital partnerships across the country.

Empowering physicians to be at the heart of health care transformation

As a health care provider, you know that the care delivery environment is changing—rapidly. Significant challenges and market pressures are at play on all fronts.

- Benefit plan sponsors are coping with extraordinary fiscal pressures and demanding more for less.
- Patients are seeking education, value, simplicity and better experience.
- Care providers are expected to deliver greater value, assume more risk and take on more responsibility.

We believe that OptumCare is uniquely positioned to help make the system better for everyone. We provide health care providers with support and tools to improve patient care and clinical quality while streamlining business tasks. The result? More time for care providers to focus on what they value most—caring for patients.

The OptumCare difference

OptumCare is not a one-size-fits-all model. In some markets, we serve exclusively seniors. In others we care for commercial, Medicare and Medicaid patients. We also have different physician models across the country, contracting with independent practice associations in some markets, and employing physicians directly in others.

Our success at OptumCare starts with our ability to select and invest in strong partners with a shared vision. We seek out opportunities to engage with high-performing physician organizations that are well-managed, primed for growth, have a focus on quality and a culture of innovation. Once we engage with a physician organization, our next step is to help maximize the performance of their operations to deliver better quality, cost and clinical outcomes.

We do this through offering health care professionals:

- Access to support, tools, data and analytics that empower health care teams to provide proactive treatment and achieve improved outcomes while managing costs
- The ability to share insights and best practices with and between OptumCare physicians across the country to help improve clinical quality
- Streamlining of administrative processes to free up more time to focus on patient care
- A customized tool box of resources based on collaboratively identified needs

Being a part of positive change in the health care industry simply can't be done without the central involvement, expertise and passion of physicians and other care providers. At OptumCare, we know that successful transformation of the industry cannot take place without physicians and clinicians helping to lead the way.
