

## OptumCare Arizona laboratory protocol

OptumCare® requires its participating providers to make referrals to in-network providers including laboratories. Out-of-network referrals will be closely scrutinized for medical necessity review.

LabCorp is OptumCare Arizona's capitated and preferred provider for all outpatient laboratory services, including drug and genetic testing. All laboratory testing that can be performed by LabCorp must be done through LabCorp. In the rare instance where a particular laboratory test is needed for a patient and it is not provided by LabCorp, please follow OptumCare Arizona referral and prior authorization policies and procedures.
