

Medical Management quick reference guide: Maricopa/Pinal Counties

Medical Management and Center for Service Coordination

Optum Medical Management programs provide high-touch care coordination within hospitals, skilled nursing facilities (SNFs) and members' homes. These programs work in collaboration with the member, the family/support system, providers and key stakeholders to coordinate discharge, health care services, community resources and referrals to the appropriate next level of care. These services are reviewed and processed by the Center for Service Coordination (CSC) team.
